

The Aenova Group at the CPhI 2013

Aenova will be exhibiting at the CPhI Worldwide in Frankfurt from **22 to 24 October 2013**. The CPhI (Convention on Pharmaceutical Ingredients) is the most important exhibition for the chemical and pharmaceutical processing industries and one of the largest pharmaceutical trade fairs in the world.

This year the Aenova Group will be putting the focus on its expertise in soft capsule production. Alongside projects to develop this modern dosage form further, we are currently investing around 15 million euros at our sites in Kirchberg (Switzerland), Cornu (Romania) and Miami (USA) in expanding and improving our production facilities for soft capsules.

We look forward to meeting you on our **stand 31H31 in hall 3.1**. As usual, the Aenova team will be happy to discuss ongoing projects and to help you with any other enquiries you may have.

You can find more information about the CPhI at <http://www.cphi.com>
