

Production Expansion at Aenova Tittmoning

Increasing High-Volume Tablet Production Capacity

Significant Investments in Continuous Manufacturing

We make the advantages of continuous production available to you. That is why we have invested in our „Enterprise Concept“ and greatly increased production capacity.

- Increased production capacity to over 10 billion tablets per year at Aenova Tittmoning
- Investment of about € 25 million as one of the strategic growth projects
- More than 3,100 sqm large production building is being constructed
- With 700 employees, the Tittmoning site will produce 10 billion tablets for more than 100 customers on all continents

CONTINUOUS MANUFACTURING

Benefits for Continuous Manufacturing for High Volume Solids with our “Enterprise Concept”

Speed

Throughput time of 8 hours per batch

Batch sizes
up to 3.5 tons

Partner of choice

Aenova significantly expanded its semi-continuous manufacturing concept to 3 billion tablets per year, setting standards for most efficient production of high-volume products, offering short lead times and attractive prices at high quality.

2022 / 2023: Our successful semi-continuous manufacturing concept will be expanded into a new building with three new lines.

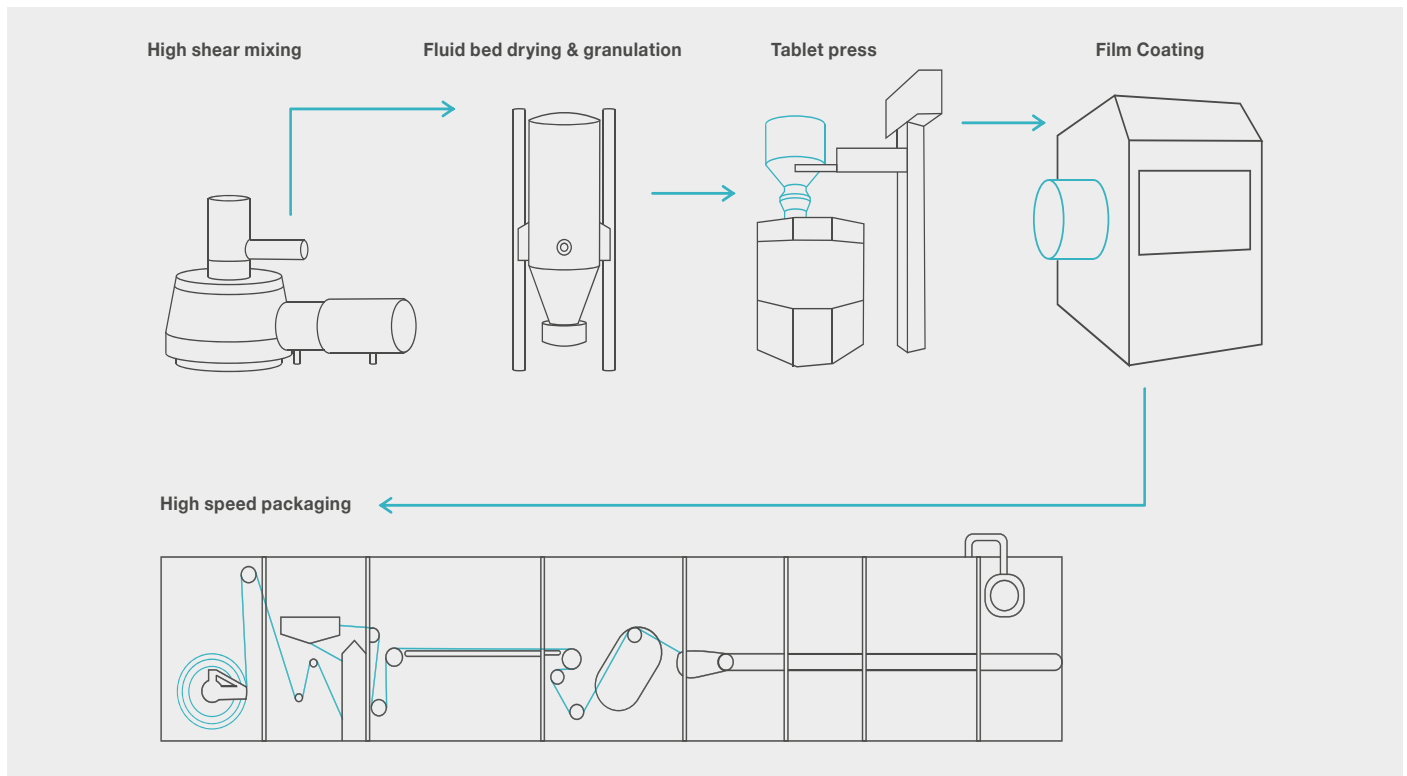

Concept

Simulation of continuous processing without adapting process technology and regulatory filing.

Benefits

Our manufacturing approach offers the advantages of a higher productivity (up to 125 million FCT per FTE), shorter lead times and larger batch sizes.

Continuous Manufacturing Process Example

Aenova Holding GmbH

Berger Straße 8 - 10
82319 Starnberg
Germany
